Historical Overview

The history of the USA began with the indigenous peoples inhabiting the land for thousands of years before European colonization in the 16th century. The first permanent English settlement was founded at Jamestown, Virginia, in 1607. The American colonies declared independence from Britain in 1776, leading to the Revolutionary War and the creation of the United States. George Washington became the first president in 1789, followed by an era of expansion and internal conflicts, including the Civil War (1861-1865) over slavery. Post-war Reconstruction and the Industrial Revolution shaped modern America. The 20th century included major events such as two World Wars, the Great Depression, the Civil Rights Movement, and the Cold War, establishing the USA as a global superpower by mid-century.[loc+2](#)
